## **INTRODUCING**

### **TRIPLE TAP® T3 SERVICE SADDLE PROUDLY MADE IN THE USA**

The Triple Tap Series T3 Service Saddle is the latest in our series of innovative products that save time, labor and inventory dollars in the water and wastewater piping industries.

#### **ADVANTAGES OF THE T3 SERVICE SADDLE**

- Unique double range band which allows for a substantial reduction in inventory. Can cut inventory by over 70% (see range chart)
  - No special tools required to install the saddle.
  - Can be used on all types of pipe including: ductile iron, cast iron, PVC, asbestos cement, steel and HDPE.
- 
- Patents have been applied for the unique extended range Cam Lug System.
  - User friendly lug system, with built in handle enables one product to carry over twice the range of a standard saddle, allowing for inventory reduction and simplification of the installation process.
  - The outlet design features a stronger spin-extruded branch with higher strength welds to resist threaded service valve installation torque and fatigue cracking.

## Triple Tap T3 Service Saddle Range Chart

Nominal Diam.	Lower Diam.	Upper Diam.	Branch Sizes	CTS	IPS	DI	Pit Cast	AC100	AC150	AC200
4	4.45	5.13	2,3,4	5.13	4.50	4.80	5.00			
4 o.s.	4.74	5.61	2,3,4			4.80	5.00	5.26	5.32	5.57
5	5.50	6.20	4	6.13	5.56					5.57
